

Summer Term Week 4- 11.5.2020

Rocky Planets

<https://www.bbc.co.uk/bitesize/topics/zdrrd2p/articles/ztsdj6f>

In our Solar System there are two types of planets- rocky and gaseous

Your task is to find out which are the rocky planets- draw them and then find out what they have in common.

Think about- size, composition and location to the sun.

**Key Words**

Sun

Rock

Metal

rotation

Can you research the missing information from these boxes?

Planet	Distance from the Sun	Rock or Gas?	What is it made out of?	Number of moons	How long is 1 rotation?
Mercury	36 million miles				59 days
Venus	67 million miles				
Earth	million miles				24 hours
	142 million miles				24.4 hours
Jupiter	483 million miles				10 hours
Saturn	million miles				
Uranus	2.8 billion miles				
Neptune	miles				6.4 days
